

# Brainstorm & ideaprioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 12 minutes to prepare
- 1 hour to collaborate
- 4 people recommended

Share template feedback

## Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

12 minutes

### Team gathering

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

### Set the goal

Think about the problem you'll be focusing on solving in the brainstorming session.

### Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and productive session.

Open article

## Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

5 minutes

### PROBLEM

To develop an AI model that converts sign language into a speech that can be understood by normal people.

### Key rules of brainstorming

To run a smooth and productive session

- Stay in topic.
- Encourage wild ideas.
- Defer judgment.
- Listen to others.
- Go for volume.
- If possible, be visual.

## Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP  
You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

### Balamurugan

- The familiar libraries are used like numpy, pandas etc
- Accurate codes are coded for execution
- The dataset are collected to go optimum recognition
- Evaluation and process of the model is done

### Arunachalaa

- Import library and load dataset.Trained the model.
- Create application using python.Create Gui to predict digits
- Analyse the accuracy of the digits
- It's implemented better understood by normal people

### Arunpandian

- Speech input provides another option for individual with disabilities.
- Evaluate and training the model.
- Create GUI to predict guests.
- Create an application using python.Using more libraries.
- Understand the abled person.

### Kailash

- Easy to use. Portable and flexible.
- At for accessibility is a Microsoft project connecting people using sign language.
- Read the input and generate the output
- Compile and run the application.

## Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

25 minutes

### Programming Aspects

- Create an application using python.
- Create GUI to predict guests .
- It is an open and free source.

### Analysis

- Analyse the accuracy of the digit.
- Accurate codes are coded for execution.

TIP  
Add customizable tags to sticky notes to make it easier to find, however, organize, and categorize important ideas as themes within your mural.

### Datasets

- The dataset are collected to go optimum output.
- Evaluate and training the model
- Import library and load dataset

### Recognition

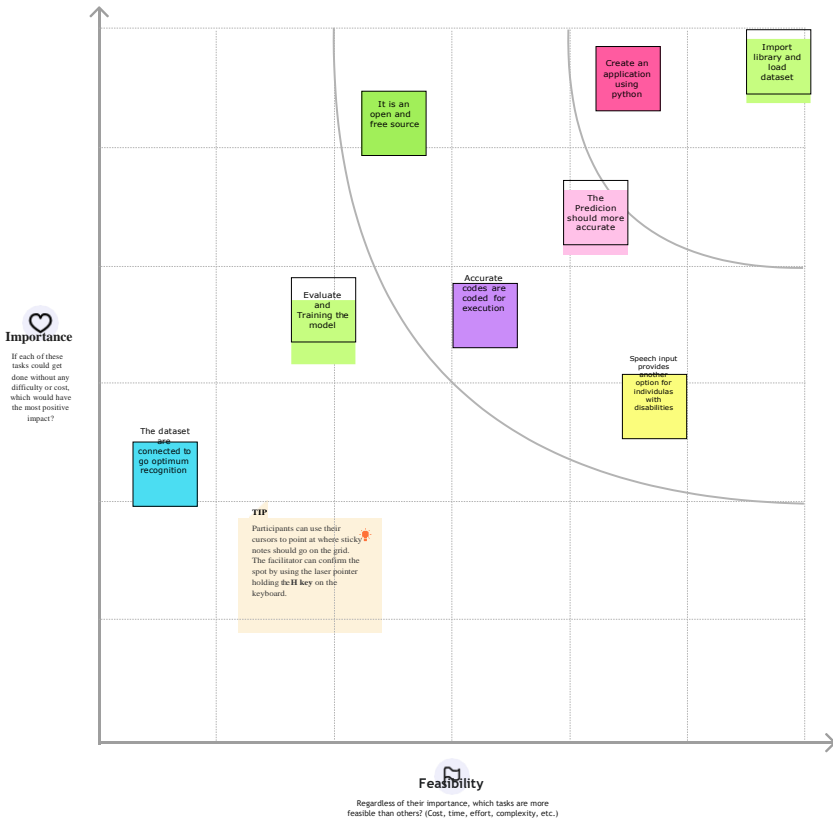

- Evaluation and process of the model is done
- Speech input provides another option for individuals with disabilities
- The dataset are collected to go optimum recognition

## Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

## After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

### Quick add-ons

#### Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

#### Export the mural

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

### Keep moving forward

#### Strategy blueprint

Define the components of a new idea or strategy.

#### Customer experience journey map

Visualize customer needs, motivations, and choices for an experience.

#### Strengths, weaknesses, opportunities & threats

Identify strengths, weaknesses, opportunities, and threats (SWOT) to develop a plan.

#### Share template feedback
